# Delta Junior 33

**The Delta Junior 33** requires very little operating space, employing a simplified analogue heat controller and fingertip pressure adjustment.  
It is suitable for use in low to medium pressure applications.

**The Delta Junior 33** features a simple robust mechanism with analogue control of the operating temperature.

**The Delta Junior 33** is produced in two versions, nominally 230-240 Volt AC for the European market and nominally 120 Volt AC for the American market.

**The Delta Junior 33** has a work area of 33 x 33 cms (13 x 13 ins).
