DECO TECH provides steel and polymer cliché printing plates for all your pad printing needs. We offer a full range of long, medium and short-run photo-polymer and steel clichés. We photo-chemically etch both thin (0.5mm) and thick (10mm) steel clichés in virtually any size to fit all major brands of pad print machinery. Quick turn around and high quality is our specialty. In addition, we also provide 10 packs of unetched water-wash polymer, alcohol-wash polymer and poly-coated laser processed pad printing clichés. Product specs are outlined below.

TYPE	LIFE CYCLE*	THICKNESS	ETCH DEPTH	ATTRIBUTES
H ₂ OPRO™	10,000	0.43mm (0.017")	variable	Color: Orange, economical, water washout
AQUAPRO I™	20,000	0.43mm (0.017")	variable	Color: Green, economical, water washout
IMAGEPRO™	20,000	0.43mm (0.017")	variable	Color: Olive green, economical, alcohol washout
DURAPRO™	100,000	0.52mm (0.020")	variable	Color: Red, finest print quality, alcohol washout
PROTOPRO	10,000	0.5mm (0.019")	fixed	Color: Green, Alcohol washout
THIN STEEL	250,000	0.5mm (0.019")	variable	Economical, Rockwell hardness: ~52
THICK STEEL	1,000,000	10mm (0.39")	variable	Finest print quality, Rockwell hardness: ~63

X-POSÉ

Check out our X-POSÉ™ exposure units which are precision designed for your in-house etching of photo-polymer pad printing plates. They feature a powder coated steel casement and are outfitted with the following easy to use controls; 1) precision digital timer (programmable from 0 to 599 seconds), 2) on/off power switch, 3) vacuum pump switch, 4) vacuum pressure gauge and 5) vacuum release button. There are two standard sized X-POSÉ™ units available and there are also four other special order models available and the largest of those units can process clichés up to 380 x 820mm (14.96" x 32.28").
