- Adjustable heater height & tiltable
- Teflon coated fiberglass belt
- Powerful IR heater with tight coils/no cold spots
- Available as table top or with stand as shown above
- Complies with CE safety standards

DT-100-IR™

COMPACT DRYING CONVEYOR

The new **DECO TECH DT-100-IR** compact drying conveyor is the smart choice for curing solvent based inks on your pad printed parts. The IR dryer's compact size (less than 8 feet square) makes this the perfect drying unit to place right alongside the molding press with your pad printing machine. The **DT-100-IR** features an 18" (460mm) wide Teflon coated fiberglass belt with a linear-tracking system to keep the belt running smooth and straight. The **DT-100-IR** dryer is full adjustable with separate controls for belt speed, temperature control (analog), heater height and heater tilt angle. **DT-100-IR** is equipped with a powerful infrared heater with a dense coil pattern and heater shields with 6.35 watts per square inch which eliminates hot and cold spots and provide the power you need to get the job cured. The heater unit comes with a 15 YEAR WARRANTY and all other components are warrantied for 1 year. To request a quote or get more information please feel free to contact our customer service staff at **(800) 300-DECO**.
